Ref. No. 4710

Dear Mr. Ranga Rao,

Dr. Kendrick has just written me that he thinks that it would be possible for Mysore to obtain the services of Mr. Sundararajan who is at present working in the Madras Health Department with Col. Russell. Mr. Sundararajan is one of the few men in India who has made a specialty of statistics and has had training in vital statistics. Dr. Kendrick says, "You certainly can not find a better man in India", and I agree with him.

I am writing to Dr. Kendrick to tell him that I have placed the matter before you and asking certain details as to present salary and status. I expect that his present position does not pay much and does not have prospects of advancement. We could use him as head of a Bureau of Vital Statistics and if he proves valuable send him on a fellowship later. In case he had to leave Madras before July would it be possible for us to start his salary before the new financial year? Could we offer him a good salary and increments? What does Government think of the policy of having such a man? These are some of the questions which occur to me. I would strongly recommend that we go somewhat out of our way to get this man if possible. I will see you about this when I return on the first February, but thought I would write now so that the matter could be considered at once.

Yours sincerely, [signature]

is a Mysorean and possesses excellent qualifications.

14) Dr Sweet has recently suggested a reorganisation of the P. Hth Dept which has been generally approved by Govt. The idea is to examine the details of the Scheme during the current year and give effect to them next year. It has also been provisionally decided to provide an additional sum of one lakh of rupees for the P. Hth Dept next year.

13) In this reorganisation of Dr Sweet's the opening of a Bureau of Vital Statistics forms an important item & we have so far as I know, no officer at present to take charge of this work. Mr. Sundararajan seems to be exceptionally well trained for taking up the work. I would suggest that the post of Vital Statistician be now created with effect from 1st April 1928 and Mr Sundararajan appointed to the post. The appointment may be on probation for two years during that period at a pay of Rs. 200 per mensem.

Dear Sir,

From correspondence with the Director of Public Health of the Madras Presidency, it would seem that Mr. T.R.Sundararajan, the Director's Research Assistant in Vital statistics, will be seeking employment shortly as he is now working on a special grant from the Indian Research Fund Association which will cease when Col. Russell goes on leave in June.

Mr. Sundararajan is a Mysorean by birth and early education as you will see by the enclosed records. He has an M.A.(Hons) fro the Madras University and has submitted a thesis for the D.Sc., degree which Col Russell thinks will probably gain him that qualification. I can certify to the M.A. degree as I have his diploma. He has done very good work in Madras and, as far as I know is the best qualified man in India in the subject of Vital statisti His work has included some census training and he would be valuable to Government in that respect also.

I do not think Government would make any mistake in employing Mr. Sundararajan as Vital Statistician with the idea of his eventually being the director of a bureau of vital statistics in a re-organised health department. There is great need in Mysore for the type of services Mr. Sundarajan can render and his research training adds to his value. After correspondence, I am sure Government could obtain the services of Mr. Sundarajan for a salary scale of Rs. 200-25-450, starting salary to be Rs.200/-. Any assurances Government would desire as to the permanence of service would be forthcoming, I am sure. The employment may date from July 1,1928.

Hoping that this letter may receive early and favourable consideration.

I am,
Yours Sincerely,

To.

@ This is being published as a Special Memoir in the Indian Journal of Medical Research.

I certify that I am a Mysorean by domicile having my ancestral home at Eswarahalli, Kadur District, and - lands in Mysore District. I was born at Ponnampet on the border land between Mysore and Coorg. All my relatives are in Mysore and my brothers are in service under the Government of Mysore. My early education up to passing the Mysore Lower Secondary Examination was given in Mysore and my application was accepted for the Mysore Civil Service Examination held in 1924, although I withdrew from the Examination in order to devote my attention wholly to research. E. R. Sundararajan was a student of the B.A. Mathematics Honours of this College in the years 1919 to 1923. He then attended my lectures on Applied - Mathematics in general and on Statistics in particular. He evinced a taste for Mathematics and was doing very well in Statistics. He has just now passed the B.A. Honours final examination of the Madras University in the Second Class standing first in that class.

His conduct while at College was very satisfactory and I can confidently say that he will be found to be intelligent, honest and conscientious in the discharge of duty.

He has since been a University (Madras) Research Scholar in Statistics under my supervision till the end of February 1924 and under that of Mr. E. B. Ross afterwards. As a research student, he has been working at Age Tables of Mysore and Madras and he read a paper on that topic before the Indian Science Congress held at Bangalore.

He impressed me as a student of more than average ability and his class work in English was extremely good. He passed the final Honours degree examination in Mathematics in 1923, obtaining the first place in the Second Class. I saw a good deal of him at the Victoria Hostel, of which he was a member for three years, and was much pleased with his quiet straightforward and gentlemanly manner.

He took a keen interest in sports and was popular among his fellow students.

His conduct throughout was exemplary and I believe he bears an excellent character.
